This guide is for Distance Learning Students enrolled in the College of Pharmacy's WPPD program.
Information about using the HSC Library for Preceptors

Quick Links
- Library Catalog
- Database Page
- E-Journals List
- Ask a Reference Question
- College of Pharmacy
- Borland Library Homepage (Jacksonville)
- Distance Learning Portal

Resources list
- UF Databases
  - Listing of databases with descriptions and free websites with descriptions
- Free Websites
  - Listing and descriptions of free sites relevant to Pharmacy
  - Includes sites of free full-text journals and books
- Free Flu Information from EBSCO
  - Includes patient information in multiple languages
  - Clinician information from Dynamed

Accessing Library Resources

Check with the Office for Experiential Programs for complete information on how to access the Library's resources.

If your Gatorlink UserName and Password won't work to log into the VPN or if you can't download software onto the computer you are using, you need to contact the COP's Office for Experiential Programs. Their contact information is at: http://www.cop.ufl.edu/departments/pp/pep/index.htm. They will be able to assist you in getting connected.

Getting full text

When you see Find it & UF in your search results, click to check for access to digital full-text material.

In PubMed, if you have accessed it through the Library's website, are logged in as a UF affiliate, and you are in either the Abstract, AbstractPlus or Citation view and you see UF HSC Libraries Online, then you should be able to get to the full text article electronically by clicking on this button.

If there isn't a link in PubMed or if the direct link from PubMed doesn't work, double check the journal title in the E-Journals List, which is the most complete listing of Electronic full text journals available through the UF Libraries.

Are measures of height and leg length related to incident diabetes mellitus? The ARIC (Atherosclerosis Risk in Communities) study.

Weitzman S, Wang CH, Pankow JS, Schmidt MI, Brancati FL

Department of Epidemiology and Health Services Evaluation, Faculty of Health Sciences, Ben-Gurion University of the Negev, P.O. Box 653, Beersheba, 84105, Israel, weitzman@bgu.ac.il.

This study was designed to estimate the risk of developing diabetes in relation to adult height components, namely leg length and leg length/height ratio. Data on 12,800 individuals without diabetes were obtained at the baseline examination from the ARIC cohort. Cox proportional hazard models were used to estimate hazard rate ratios of diabetes for each 5-cm difference in leg length and 1 SD difference in the leg length/height ratio. During a mean follow-up period of 7.6 years, the age-adjusted incidence per 1,000 person years of follow-up was 25.8, 24.2, 10.4, and 16.2 in African American

e-Journal Tips

- Double check in eJournal list
  - Even if you know we have a journal
    - Don’t always get from Publisher
      - Example: Lancet through ScienceDirect not at Lancet.com
  - If the list says we have access to something and you can’t get it — contact me - I will investigate.
  - Double check the eJournals list if the link within a database doesn’t work
Boolean Nesting

- When using 2 different commands (AND, OR, NOT) in 1 search statement, use parentheses to clarify your intent:
  - (Medicare OR medicaid) AND pharmacies
  - (Medicaid NOT Florida) AND pharmacies
  - Do not do this: (medicare AND aged) OR pharmacies
    - You will get the world of articles on pharmacies not related to medicare and the aged.
Natural v. Standardized Terms

- **Keywords** = whatever words in whatever forms both you and the author happen to think of

- **Subject headings** = standardized terms that mediate between whatever words any searcher thinks of and whatever words all authors think of and all the various possible grammatical forms (n, adj, v, adv) and all homonyms (*hearing*)

- Varsiously called **Descriptors**, **Headings**, **MeSH** and found under **Thesaurus**, **Headings** or **MeSH Database**
Controlled Vocabulary

- Thesaurus
- Vocabulary
- Subject Terms
- Descriptors
- Subject Headings
- MeSH
Textword vs Controlled Vocabulary

- **Keyword or Textword**
  - Car
  - Van
  - Ford
  - Chevy
  - Chevrolet
  - Sedan
  - Automobile or auto
  - Nissan
  - etc

- **Controlled vocabulary**
  - Automobile
  - Definition: All makes and models of passenger vehicles that have 2 axels
MeSH: Medical Subject Headings: One thesaurus

- Controlled vocabulary
  - Standardized set of terms
  - used to search PubMed
- Hierarchical
  - Broad to Narrow subjects
  - Exploding a broad term also searches the narrower terms
- Excludes newest materials
MeSH Tree

- Penicillins
- Antibiotics, Lactam
- Antibiotics
- Anti-Infective Agents
